

ADAPT IT AUSTRALASIA

Adapt IT Australasia Limited, a New Zealand registered company since 2009, is a subsidiary of Adapt IT Holdings Limited, which is registered in South Africa and listed on the Johannesburg Stock Exchange. Adapt IT has been involved in the education sector for more than 30 years and has in excess of 200 education sector clients worldwide.

“Adapt IT Australasia is committed to bringing you solutions for today and tomorrow. We work closely with sector participants and tertiary education organisations to enhance our products and identify opportunities.”

Joining forces with Student Management Software Solutions in 2015 and Meta Office in 2016 places Adapt IT Australasia in an ideal position to offer tertiary sector clients a range of products to meet the requirements of a diverse range of institutions, from the smallest Private Tertiary Establishments, Polytechnics and Wānanga to large Universities.

Effectively managing student related information is a key challenge for tertiary education providers. Get it right, and you'll have everything you need at your fingertips. Take2 will transform the way you work, saving time and resources, offering new standards of efficiency, and empowering you to deliver an improved, more informed service to your stakeholders and students.

We place strong emphasis on gathering customer feedback to influence our product development roadmap and, as a learning organisation, have added additional stages to our development methodology to increase our business analysis and user acceptance testing processes.

Take2 was developed with flexibility in mind and our operational mantra is to work together with our clients to find the best fit to support business rules and processes.

TAKE2 – CERTIFIED AND COMPLIANT

Take2 is a suite of Student Management Software for New Zealand Tertiary Education Providers who need a cost-effective solution that will allow them to meet the compliance requirements of government agencies.

The product is being used by over 100 training providers located throughout New Zealand.

Take2 was the first student management system to be certified by the Ministry of Education as Single Data Return compliant. That certification has been renewed every year since.

Take2 uses a standard operating environment to give a familiar “look and feel” and to provide for good integration with Microsoft Office applications.

Take2 is comprehensively supported with a detailed user manual, topic specific Tip Sheets, a regular newsletter and quite simply the best helpdesk in New Zealand.

Extended support options are available to assist new training providers or existing organisations that may require regular independent advice on compliance reporting.

Two editions of Take2 are available.

- Our cloud-based Access edition is suitable for organisations with up to several thousand enrolments each year
- The SQL Server edition can handle tens of thousands of annual student enrolments. Examples of the added benefits of the SQL Edition includes the handling of multiple providers on a single database instance, enhanced access control and additional interfacing to 3rd party products.

RELIABILITY

Take2 has an excellent track record as a reliable, “no fuss” student management system. Take2 has been designed from the outset to be user-friendly and intuitive to use, and easy and straightforward to install. The Take2 Helpdesk is recognised as being quick to respond and staffed by experienced people who know what you are talking about.

COMPLIANCE

Take2 is always up to date with the latest requirements from bodies such as the Ministry of Education, TEC and NZQA. Their requirements for information change frequently but Take2 will always be one step ahead, meaning you will never have to worry about not being compliant with the latest changes.

VALUE FOR YOUR MONEY

The annual support fee provides access to the Take2 Helpdesk and regular upgrades to the software.

Student Management

- Manage curriculum (including import from NZQA and TEC curriculum registers)
- Attach and manage documents/files related to curriculum elements

Interested in viewing the Take2 system?

If you're interested in seeing Take2 in action contact us to arrange an online demonstration. All you will need is a computer connected to the internet. We will be more than happy to answer any questions you might have.

Benefits of Cloud

- Access Take2 with Windows or Apple computers, or a tablet to quickly record outcomes and attendance.
- You don't have to buy and maintain a server—no CAPEX spend
- No third party technician or inhouse staff required to set up Take2 and manage updates.
- New releases of Microsoft Office or Windows taken care of.
- You can run other applications in the Cloud alongside Take2. For example you could have access to Word, Excel and other Microsoft products in the Cloud—this at a lower cost than having to buy and install new versions of Office yourself.
- You no longer have to worry about installing or updating Take2. We do it for you and send you the release notice and documentation in the usual way.
- We continue to provide our renowned support, including using TeamViewer. We can even review your data without you having to send us your Take2 database.
- Your Take2 data is securely backed up in the Cloud. Simply exit your Take2 session and the data is stored and backed up.

COMPLIANCE

Take2 is annually certified by the Ministry of Education as complying with mandatory reporting requirements of the:

- Ministry of Education Single Data Return (SDR)

In addition... providing reporting and data extracts to the following organisations

- New Zealand Qualifications Authority (NZQA)
- Studylink Verification of Study (VOS)
- National Student Index (NSI)
- Literacy and Numeracy (LLN)
- Public Trust
